

CHARLOTTE T. ISERBYT/3D RESEARCH COMPANY PRESENTS

## **EXPOSING THE GLOBAL ROAD TO RUIN THROUGH EDUCATION**

*Available at Amazon.com by 3D Research Company*  
(<http://www.deliberatedumbingdown.com/>)

This YouTube version of *Exposing the Global Road to Ruin through Education* is the result of two 2-day conferences held in Maine and Georgia, August 2012 and August 2013. Fifteen of the nation's most respected education and political researchers, writers and speakers, including public school teachers—some in the trenches since 1965—were videotaped. A special roundtable discussion involved researchers/activists from Florida and Tennessee and provides up-to-date information related to Common Core, tax-funded school choice and charter schools with their unelected boards. Steve Schran, veteran public school educator from Maine, served as consultant to the project.

Extremely important Written Submissions (contained on Disc #8 as a pdf), some directly related to dangers inherent in amendments to the *U.S. Constitution*, under the guise of protecting parents' rights, religious freedom and related to home schooling, are included. These written works are provided by presenters at the conferences as well as by researchers who were not able to attend. These can be

downloaded separately at  
<http://www.deliberatedumbingdown.com>.

A **limited number** of copies of the original eight-disc video set of presentations and Written Submissions is available for sale at Amazon.com.

Those of us involved in the production of *Exposing the Global Road to Ruin through Education* (ETGRTRTE) are calling on viewers, here and abroad, to make this YouTube version of the video disc set go *VIRAL/GLOBAL!*

WHY?

Because the videotaped presentations and Written Submissions deal extensively with the fact that **ALL** nations, not just the United States of America, are under attack—not by a militarily armed enemy, but by an enemy that is determined to extinguish whatever semblance of individual freedom through law, rooted in morality and conscience, still exists on this planet. How can this be done? Through the implementation of a new and unconstitutional “kid on the block”—tax-funded, **private** education run by **unelected** boards that will allow the following groups to carry out questionable, unconstitutional activities without taxpayer/voter approval. “Their” agenda can be accomplished through/by the use of the following “C” words:

- Career education (Soviet-style polytechnical education/quota system)
- Carnegie Corporation's 1934 *Conclusions and Recommendations*. (Click on <http://www.americandeception.com> and type "conclusions" into the search engine. This book is the *smoking gun*.)
- Change agents
- Chambers of Commerce
- Choice/charter schools (tax-funding of private and parochial education with no elected boards = taxation without representation)
- Council on Foreign Relations (CFR)
- Council on National Policy (CNP)
- Council of Chief State Schools Officers (CCSSO)
- Cults, Christian and New Age (occult sciences)
- Communism
- Common Core
- Core curriculum (former UN Under-Secretary Robert Muller's *World Core Curriculum*)
- Community education (limited learning for lifelong labor, with **all** services under umbrella of community school, run by unelected councils)
- Communitarianism
- Community organizing (Saul Alinsky's *Rules for Radicals*)
- Competency-Based Education (Office of Economic Cooperation and Development, OECD, in Paris, France, Skinner/Pavlovian Outcome-Based Education method)

- Conflict (constant warfare, Hegelian Dialectic)
- Computers (values change/assessment/data collection/distance learning)
- Congress (U.S.)
- Corporations (global)
- Critical thinking  
(Marxist/Luria/Vygotsky/Freire/Bloom/Marzano)
- Consensus (group think/dialectic)
- Council (unelected communist form of government, or soviet)
- Constitution (Council of the States, Conference of the States, Constitutional Convention/balanced budget amendment)
- Co-operative learning (group think/collective mentality)
- Culture change
- Cybernetics

Whatever freedoms exist on planet Earth are being replaced by a totalitarian system characterized by unelected/regional councils/boards, global education/mandated workforce training, and a Planning, Programming, Budgeting Management System (PPBS) administered by:

1. The United Nations and other international/regional groups and non-governmental organizations,
2. Industry/corporations,
3. Governments (federal, state, local, regional),

4. Schools and universities (public and private),
5. Tax-exempt foundations and organizations, and
6. Postmodern, cult-like New Age churches.

However, there is still time to reverse “their” agenda. The above six groups are *BEHIND* schedule!

These groups hoped to destroy the USA in 1976 during the 200<sup>th</sup> anniversary of the signing of the *Declaration of Independence* when 125 members of the U.S. Congress signed the Declaration of *Interdependence* that called for the USA to join in a World Government. (See [http://www.scribd.com/doc/38872622/Declaration](http://www.scribd.com/doc/38872622/Declaration-of-Interdependence-1976) -of-Interdependence-1976)

Effective opposition by dedicated researchers, writers and Constitutional activists over a period of at least 100 years has thwarted “their” plan to make the USA just one of hundreds of countries in a totalitarian world system. These victories were deliberately and effectively ignored by the controlled media that didn’t want the general population to know an undeclared, internal war against our Constitutional system was being waged.

We have stalled their efforts for at least 39 years! We *MUST* continue the opposition/resistance. Future generations—your children and grandchildren!—are counting on us.

One cannot win a war without identifying the enemy.  
One cannot win a war without ammunition.

This war is the most deadly war in which the world has ever been engaged. It is a war against the individual: against his soul, conscience, intellect and creativity, all of which collectively equal the essence of “humanity.” The following quote pertains to the dangers of abandoning traditional education: “If education is beaten by training, civilization dies,” C.S. Lewis writes, for the “lesson of history” is that “civilization is a rarity, attained with difficulty and easily lost.” It is the liberal arts, not vocational training, that preserves civilization by producing reasonable men and responsible citizens. (Gregory Dunn, “C.S. Lewis on Liberal Arts Education,” *On Principle*, Vol. 7, No. 2, April, 1999.)

The YouTube version of *Exposing the Global Road to Ruin through Education* is your Tool Kit (ammunition) to win this war that is determined to destroy the cultural identity of ***ALL*** nations. I repeat, ***ALL*** nations! It’s not too late to join the fight.
